

## Role: Water Network Support Officer

### Job Description

We are seeking network support officers/control room operators to monitor water distribution systems for utilities boards in countries worldwide. Working in shifts, control room operators are responsible for monitoring water supply anomalies raised by water distribution systems on a timely basis, and alert the relevant agencies for potential pipe bursts and leakages. Essentially, control room operators are responsible for minimising the loss of a precious resource worldwide – water.

Training will be provided to learn the response procedures required for anomalies of various complexities. During shifts, operators must be able to effectively communicate with fellow personnel in order to determine appropriate courses of action.

Join us now for a fulfilling career that helps countries worldwide solve water issues.

### Skills & Requirements

**Qualifications:** Candidates may possess a Diploma, Advanced/Higher/Graduate Diploma, or equivalent. An Associate Degree in a technical field is desirable. NITEC or similar certifications can be considered.

- Current students are encouraged to apply
- No prior work experience is required as training will be provided
- Willing to work in shifts (3-4 days per week), with overtime pay if applicable
- Able to efficiently operate a computer and basic applications (web browser, MS Office)
- Possess good judgement and interpretation skills
- Able to work with minimal supervision
- Only Singaporeans will be considered
